

Birth Injuries -- Injury to Newborn (PSI 17)

2003-2005

Hospital	Patients	Observed Rate	Expected Rate	Rating
Uintah Basin Medical Center	1,442	0.00	6.20	***
Heber Valley Medical Center	707	0.00	6.25	***
Beaver Valley Hospital	332	0.00	6.28	***
Delta Community Medical Center	301	0.00	6.15	***
Mountain View Hospital	2,695	0.74	6.22	***
Logan Regional Hospital	7,889	0.76	6.23	***
Ogden Regional Medical Center	6,350	0.79	6.23	***
Castleview Hospital	1,198	0.83	6.23	***
Jordan Valley Hospital	6,291	0.95	6.24	***
Ashley Valley Medical Center	929	1.08	6.21	***
Valley View Medical Center	2,317	1.29	6.24	***
St. Mark's Hospital	9,940	1.31	6.24	***
Salt Lake Regional Medical Center	4,961	1.41	6.23	***
McKay-Dee Hospital Center	10,530	1.42	6.25	***
Cottonwood Hospital Medical Center	10,676	1.59	6.23	***
Utah Valley Regional Medical Center	12,825	1.64	6.23	***
Davis Hospital & Medical Center	7,572	1.72	6.25	***
Pioneer Valley Hospital	3,460	2.02	6.25	***
Alta View Hospital	6,137	2.12	6.23	***
Dixie Regional Medical Center	7,328	2.32	6.23	***
American Fork Hospital	8,253	2.79	6.24	***
LDS Hospital	12,767	2.98	6.23	***

Note: Because birth injuries are quite rare, this table includes three years of data. Some birth injuries associated with this indicator might be minor or not preventable by hospital practitioners.

The definition of this indicator changed in late 2003. Prior to October 2003, "head molding" might have been included in the indicator. "Newborn head molding" is an abnormal head shape that occurs from pressure on the baby's head during delivery. This is not a serious condition and the baby's head often returns to its normal shape in a few days.

More than half of Utah hospitals in this table (23 out of 38 or 61%) had fewer than expected birth injuries compared to similar hospitals in the U.S.

Rating:

*** Lower rate than expected (better)	** Same as expected	* Higher rate than expected
---------------------------------------	---------------------	-----------------------------

Observed Rate: percentage of newborns who experience an injury

Expected rate: percentage of babies who were expected to experience an injury at this hospital if it performed the same as other U.S. hospitals that delivered a similar ratio of males and female babies
